ONLINE SHOPPING

- 1 Online shopping is shopping on the internet. This is a great way of shopping for young people nowadays. Why? Because it is fast and easy and because you can buy products in online shops which you cannot buy in a normal shop. Another important thing is that the products in an online shop are usually cheaper.
- 2 What do young people buy on the internet? Many of them look for music and games. They look at the prices of new CDs and DVDs in online music shops. They look for new types of MP3 players - and good prices! They also try to find new and interesting games to buy and play with friends in their free time.
- 3 Girls buy clothes over the internet: jeans, dresses, sweaters, skirts, hats and jewellery like earrings and piercings. Some buy old clothes, for example from the 70s and 80s, when they want to look cool at a party. You can find clothes for all kinds of styles: punk, Indie, Goth.
- 4 Online shop owners know about young people's likes and dislikes. They do their best to sell things they know young people like. They know that young people's styles often change, so they offer a big choice of products. Also their websites are exciting and interesting to look at.
